HYDRAULIC MACHINERY

We are equipped to handle orders for hydraulic machinery in all its many branches—valves, pumps, accumulators, presses, benders, shears, shaft straighteners, etc.
Our large line, over 5000 complete machines, probably offers a standard model that will meet your requirements. If not, our experience of over 75 years building hydraulic machinery is yours for the asking.

Power, Electrical, and Industrial Machinery

Allis-Chalmers equipment used in many of the leading plants of the country includes heavy machinery for many varied engineering and power purposes, prime movers of all types among which are some of the largest units ever built, complete crushing and cement plants for large dams and irrigation projects, electrical apparatus and many complete lines of industrial machinery.

By reason of this experience the Allis-Chalmers Organization is able to propose and furnish equipment best suited to meet the particular requirements of its customers. With complete equipment built by one organization, under a single supervision, the many details, complications and delays incident to divided responsibility are avoided.

MORSE
SILENT CHAIN DRIVES

Used in all industries for transmitting power from ¼ to 5000 H.P. Chain speeds up to 1200 to 1600 ft. per min., sprocket speeds from 250 to 6000 R.P.M. Sprocket centers any reasonable distance, —usually from 12 to 120 in. Advantages are positive speed ratio, 98.6% to 99% constant efficiency, quiet operation at all speeds, any convenient distance between sprocket centers, little lubrication at infrequent intervals, unaffected by heat, cold, or moisture, long life, low up-keep cost.

Dayton Swaging Machines

For pointing and reducing rods and wire to accurate size, the Dayton Swaging Machine is unexcelled. The 4-6,000 rapid squeezing hammer blows per minute improve the texture of the metal, give a smooth finish and eliminate scrap. Our complete booklet, "The Modern Art of Swaging," is yours on request.

Shuster Automatic Wire Straightening and Cutting Machines

take the material from the coil, straighten and cut it to accurate lengths at high speed with *small maintenance charges.*

They handle steel, iron, brass, copper, aluminum or special alloys with equal facility.

We make these machines in many sizes and lengths, and both belt and motor driven. Also machines for squares, hexagons, flats, strip and sheet metal.

"Elastic Rotary" Blow Riveting Machines

(Trade Mark)

which form any shape head required in an instant. Made in many sizes and adapted for various classes of work, heavy agricultural implements, automobile parts, light novelties, hardware articles, toys, small tools, etc.

The force of the blow is always under the control of the operator and the work may be riveted tight or loose as desired.

Dings Magnetic Pulleys —"High Intensity"

A DINGS "High Intensity" Magnetic Pulley combines greater pulling strength with lower current consumption—simply the result of better design evolved by Dings engineers.

There is nothing skimped in a Dings as a comparison of the weight with that of other pulleys will show. You get a high powered pulley capable of stopping all the iron that passes over it, at a cost that can't be equalled.

—there is a type and size for every service.

Edwards Metal Ceilings and Walls

Economical
Ornamental
Sanitary
Permanent
Fireproof
Moisturepoof
Verminproof

Metal Ceilings are no longer a luxury—they may almost be said to be a necessity. Where formerly they were used almost exclusively in churches, stores, halls and other buildings, they are now also extensively used in private residences, factories, etc. Metal is the most sanitary and easiest to keep clean of any ceiling, is absolutely fire, moisture and verminproof, makes the room cool in summer and warm in winter and there is absolutely no danger from falling plaster.

Write for Large "Ceiling" Catalog "H" Showing Complete Line.

TO USE THIS BOOK EFFICIENTLY

Read This Page NOW—and Save Your Time When You Are BUSIER

Address and Local Distributors Section—

Beginning on page 7, gives the names and addresses of manufacturing and other concerns, with branch offices and local distributors of many advertisers.

Index to Classifications of Products—

Beginning on page 351, shows all items of Material, Supplies, Equipment, Machines, etc., indexed and cross indexed in the terms that come first to your mind. Thus "Dredging Buckets" are shown as "Buckets, Dredging," and as "Dredging Buckets." It is preferable, however, always to look for the NOUN.

Classified Products Section—

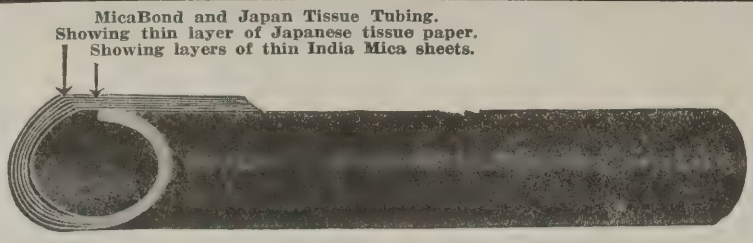
Beginning on page 501, lists under the name of the product the names of the manufacturers of this product. That those shown in black-faced type are especially equipped to quote is evidenced by their readiness to spend money to secure your inquiries—it will pay you to write them.

All Products are listed alphabetically according to the noun, excepting in the case of "Machinery" and "Textile Machinery," which for your convenience are brought together into two main groups, the former embracing classifications 7671 to 9499 and the latter embracing classifications 14993 to 15489; here the various kinds of machines and machinery are subclassified, each with its own classification number.

Sometimes a general classification, such as "Lumber," appears. Subclassifications appear immediately following the general list, however.

Various trades are listed, also, such as Architects and Contractors. In the larger lists the arrangement is geographical, for your more ready convenience. In the smaller lists the arrangement is alphabetical as to firm names.

Classification numbers, corresponding with the numbers in the Index to Classifications of Products, are shown above the outer column of each page.



If you refer directly to the Classified Products Section, look for the NOUN, thus, "Wardrobes, Office," not "Office Wardrobes."

Tradename Section—

Beginning on page 2301, carries the trade-names of all articles in industrial use put out within the past twenty-five years. We have thousands of additional trade-names on file, however. If you know a trade-name but not the name of the manufacturer, use the Trade-name Section.

And Remember—

We have a Complete Service Department ready to give you any further information or assistance you may desire.

Monel metal

Serves Where Stress and Corrosion Attack

¶So wide and varied are the applications of Monel Metal that practically every industry has utilized its unique combination of qualities to meet difficult conditions. Manufacturers have adopted it, knowing its strength and toughness, appreciating at the same time its resistance to corrosion, high temperature, oxidation and superheated steam. ¶The ease with which Monel Metal can be kept clean commends it to manufacturers, in whose appliances or equipment the utmost sanitation is required. It is the logical metal for the hospital, the kitchen, the soda fountain, or where beauty, as well as utility is permanently desired. ¶This versatile, durable metal is being used for light and heavy construction, exposed to extremes of cold and heat, and subject to moisture, acid, chemicals, etc. It is permanent and cannot rust. ¶The experience of thousands of users in many industries is at your disposal for the asking.

Physical Properties of Monel Metal

Color.....White
Melting Point.....1360° C. (2480° F.)
Specific Gravity.....8.80
Weight per Cubic Inch.....0.320 lbs.

Coefficient of Expansion:
(25° C.—100° C.).....0.000014 per 1° C.
(25° C.—300° C.).....0.000015 per 1° C.
(25° C.—600° C.).....0.000016 per 1° C.

Electrical Resistivity.....256 Ohms per Mil-Ft.
42.5 Michroms per Cm.
Coefficient of Electrical Resistivity: 0.0019 per ° C.
Electrical Conductivity .....4% of that of Copper
Optical Reflectivity.....60% of that of Silver
Heat Conductivity.....0.06 C. G. S. units
1/15 of that of Copper
Hardness Hot Rolled Rods: (Shore Sclerescope) 22—25

Hardness (Brinell, 3,000 Kg.)
Hot Rolled Rods.....144—162
Cold Drawn Rods.....180—200
Castings.....105—115

Modulus of Elasticity (Young's).....25,000,000
Specific Heat (20—1300° C.) 0.127 cal. per gram per ° C.

Magnetic Induction at 100 gausses
Cast Metal.....500 gausses
Rolled Metal.....1000—1500 gausses

Tensile Tests on Castings:
Yield Point.....30,000—40,000
Tensile Strength.....65,000—80,000
Elongation.....25—35%

Tensile Tests on Sheets (Hot Rolled):
Yield Point.....25,000—35,000 Lbs. per Sq. In.
Tensile Strength.....65,000—75,000 Lbs. per Sq. In.
Elongation.....35—45%

Tensile Tests on Sheets (Cold Rolled):
Yield Point.....90,000—110,000 Lbs. per Sq. In.
Tensile Strength...100,000—120,000 Lbs. per Sq. In.
Elongation.....1—2%

Tensile Tests on Hot Rolled Rods:

The uses of Monel Metal and Nickel have been so extensive and so much data has been collected of its behavior under various conditions, that the experimental nature of any application has been reduced to a minimum. This is an important factor in determining a new use for Monel Metal and Nickel, and The International Nickel Company wants prospective users to call upon them for information and co-operation.

INCo MONEL METAL TRADE MARK

Monel Metal is a technically controlled Nickel-Copper alloy of high nickel content. It is mined, smelted, refined, rolled and marketed solely by The International Nickel Company. The name "Monel Metal" is a registered trade-mark.

C-H

Motor Starters and Speed Regulators

have been used for more than a quarter of a century. No matter what the type of motor—alternating current or direct current—or what sort of a machine the motor drives, there is a C-H Motor Controller which will enable you to get the most satisfactory service out of your motor driven equipment. Cutler-Hammer engineers will gladly assist you in selecting the right motor starter or speed regulator for your work.

Type T Heavy Duty RELIANCE MOTORS Direct Current

General service motors designed for constant and adjustable speed duty.

(Speed adjustments by field resistance control)

Type T motors represent the combined experience of thirty-five prominent electrical engineers in the large steel mills and machine shops. They embody the combined ideas of men who have had unusual opportunities to learn the need for quality and strength in every motor detail.

10240c— *Oil-of-Salt

MOSSO C. A. LABORATORIES, INC. (Forty years ago we introduced OIL-OF-SALT to a few manufacturers. They used it, liked it, and bought more. Other manufacturers heard of it and likewise provided it for their factories. And so it grew in reputation. Today its use has spread to thousands of the largest manufacturers in the world, any of whom will testify to its merits as a practical, effective First Aid Dressing.
OIL-OF-SALT is harmless and non-irritating, yet offers every "First Aid" requirement in one bottle.
Use OIL-OF-SALT faithfully. Never neglect an injury of any character. The smallest cut, seemingly of little importance, is fully as treacherous as the deepest cut or the most serious injury. To understand that you have but to consider statistics, which prove that over 87% of all compensation paid by liability insurance companies is due directly to minor cuts, lacerations and similar injuries. Do not hesitate to use it for any condition. It is harmless and can be used with perfect safety.
OIL-OF-SALT is used with positive results by government, city, and fire department officials, and by hospital authorities in the general manufacturing and transportation fields.
